Reviewer A:

Title

Title reflects the essence of the content of the article (content, method, novelty)

:

the study of women's position in the context of culture and customary construction is interesting to review. because not all cultural constructions in Indonesia position women in a marginal way. for example in West Sumatra and Aceh, the position of women is quite strong in their cultural construction. as in Mandar also know the culture of sibaliparriq. in the context of Islamic law the relationship between women and men is not marginalized.

Abstract

Abstract contains problem of research, method, and result

:

please state the research methods used, theories and data collection techniques in this study.

Originality

The originality of the subject matter, and the manuscript would be of interest to the the scholar of Islamic countries in general and specifically in Indonesia :

Studies on women related to cultural construction have indeed been carried out by many researchers. studies on the construction of Mandar culture associated with gender and Islamic law have not been widely studied. Therefore, this study is of interest to scholars in Indonesia and internationally.

The Depth of Literature

Whether the article draws on an appropriate range and depth of literature (if not please indicate which sources of literature should be included by the author in future):

need to add international reputable journal articles related to the focus of the study.

Finding Presentation

Whether the findings presented are subjected to suitable analysis and sound conclusions drawn:

His discussion and analysis linking women, cultural constructions and Islamic law is something interesting because it is different from cultural constructions in other parts of Indonesia.

Implications for understanding the study of Islamic family law and Islamic law in Islamic in Islamic countries in general and specifically in Indonesia:

the implication of this article is that not all cultural constructions in Indonesia position women in a marginal way, in fact in Mandar the position of women is quite equal and they help each other in household life, seeking fortune. Therefore, this is in line with the concepts of the Koran (living Qur'an) and Islamic law.

Technical writing

Articles must be in accordance with the surrounding style and journal template:

need some adjustments. 1. introduction please add research methods. 2. discussion and analysis need to be added. 3. Relevant journal article references.

Additional comment for the author:
acceptable with some improvements.

Is the article qualified for publication?

Please indicate your suggestion whether this article is qualified for Samarah:

Minor Revision

Reviewer B:

Title

Title reflects the essence of the content of the article (content, method, novelty):

the study is interesting because it raises the construction of Mandar culture which is associated with sibaliparriq. then associated with Islamic law as the focus of the study of samarah journals. because the suggestions for revision in the title are stated concretely, namely the words "sibaliparriq", "cultural construction," gender and "Islamic law." because it is a vague focus.

Abstract

Abstract contains problem of research, method, and result:

keywords please adjust to the revised title, for example, gender relations, cultural construction, sibaliparriq or Islamic law.

Originality

The originality of the subject matter, and the manuscript would be of interest to the the scholar of Islamic countries in general and specifically in Indonesia :

This study contains authenticity because it discusses the cultural construction of women's relations in Mandar. because it will always be of interest to researchers and writers in Indonesia and the international community, especially in relation to Islamic law

The Depth of Literature

Whether the article draws on an appropriate range and depth of literature (if not please indicate which sources of literature should be included by the author in future):

references are still too minimal, please refer to Scopus journals such as Studia Islamika (Jakarta), JIIS (Surabaya), Qijis (Kudus), Al-Jamiah (Yogya) Ahkam (Jakarta), Ihkam (Madura), Juris (Batu Sangkar) which studies about gender, cultural construction and Islamic law in Indonesia.

Finding Presentation

Whether the findings presented are subjected to suitable analysis and sound conclusions drawn:

This study explains well about the construction of culture and women's relations in relation to Islamic law and law.

Implications for understanding the study of Islamic family law and Islamic law in Islamic in Islamic countries in general and specifically in Indonesia:

The implication of this article is to refute the argument that cultural constructs corner women. On the other hand, in Mandar, cultural construction positions women as equals and works together between men and women in the family.

Technical writing

Articles must be in accordance with the surrounding style and journal template:

1. The methodology in the introduction needs to be emphasized.
2. discussion and analysis is still lacking, please add.
3. Field data, especially sibaliparriq in Mandar, should be further enriched.

Additional comment for the author:
need some repairs,
